

Valuable Tire Tips

- Keep your tires properly inflated to avoid poor performance. Check the sticker on your vehicle's doorjamb or consult the owner's manual to determine appropriate tire inflation.
- You may be able to save up to \$1.50 per fill-up by simply keeping your tires inflated to the proper pressure¹.
- You can improve your gas mileage by around 3.3 percent by keeping your tires inflated to the proper pressure².
- Check the tread depth on your tires with a tire gauge or by inserting a penny into the tread (if you can see all of Lincoln's head, it's time for new tires.)
- Rotate your tires every 6,000 – 8,000 miles. This helps equalize treadwear.
- If you notice uneven tire wear, bring your vehicle in for an alignment.
- Get your tires balanced at the first sign of a vibration or shimmy.
